Major Constraints		
Add the constraints you face in working on the tasks mentioned in the mentorship (for example: data cleaning, creating a content calendar)		
1	Data quality and availability: Limited or poor data can impact initial data and model training, affecting the accuracy and reliability of the forecast.	
2	Computational sources: inadequate computational strength or get right of entry high-overall performance hardware can sluggish down the model education & evaluation process, particularly for massive datasets or complicated fashions.	
3	Time Constraints	
Find resources on your own that can help you and add below
